DIGITAL PROBE THERMOMETER

Device Name: Instant Read Digital Food Thermometer

Measurement Mode: Immersion/Penetration probe

Intended Use: Measuring the temperature of food, liquid, pastes and semi-solid materials

Measurement Range: -58.0°F/-50.0°C to 572°F/300°C

Measurement Accuracy: $\pm 1^{\circ}\text{C}/\pm 2^{\circ}\text{F}$

Reaction Time: 3-5s

Resolution of Display: 0.1°C/°F (<100°C/212°F), 1.0°C/°F (>=100°C/212°F)

Waterproof level: IPX5

Measuring Rate: 0.5s

USEAGE AND CALIBRATION

Hold Function

Press the button once before removing it from meat or other kinds of food to hold the current temperature reading.

Switch between °C and °F

Hold the button for 2 seconds to switch temperature unit between °C and °F

Charging

You should use a 5V USB adapter with a minimum of 500mA current. Most mobile phone adapters will work for charging this device.

Calibration

The calibration range is -3.0°C to +3.0°C/-5.0°F to 5.0°F. Press the button and unfold the probe at the same time to enter calibration mode. The LCD screen will show "CA". Short press to select calibration. Put the probe into a cup of ice water, short press again to set your calibration value to 0°C. Hold and press button to scroll to your calibration value quickly. The set value will be saved automatically after 10 seconds.

EXTRA FEATURES

Auto-on/off: Turns on automatically when the probe is unfolded, and turns off automatically when folded.

Auto Restart: If there is no operation for 10 minutes, the thermometer will turn off automatically. If there is a sudden change in temperature, it will turn back on, or you can simply push the button once to resume measuring.

LCD Display: Displays the measured temperature and battery level.

Backlight: Automatic backlight turns on when the probe is unfolded. The backlight will turn off after 20s in normal mode or 60s in HOLD mode.
